

Fundamentals of Laravel - Part 3

Routing

Basic Example:

```
Route::get('/path', function () {});
```

Route Parameters:

Required:

```
Route::get('/user/{id}', function ($id) {});
```

Optional:

```
Route::get('/user/{name?}', function ($name = 'Guest') {});
```

Route Groups:

Middleware

Prefixing

Controllers

Creating a Controller:

```
php artisan make:controller
```

Resource Controllers:

RESTful routes (index, create, store, show, update, delete)

Invokable Controllers:

Single-action controllers
